

RAINWATER SYSTEM

For rainwater drainage

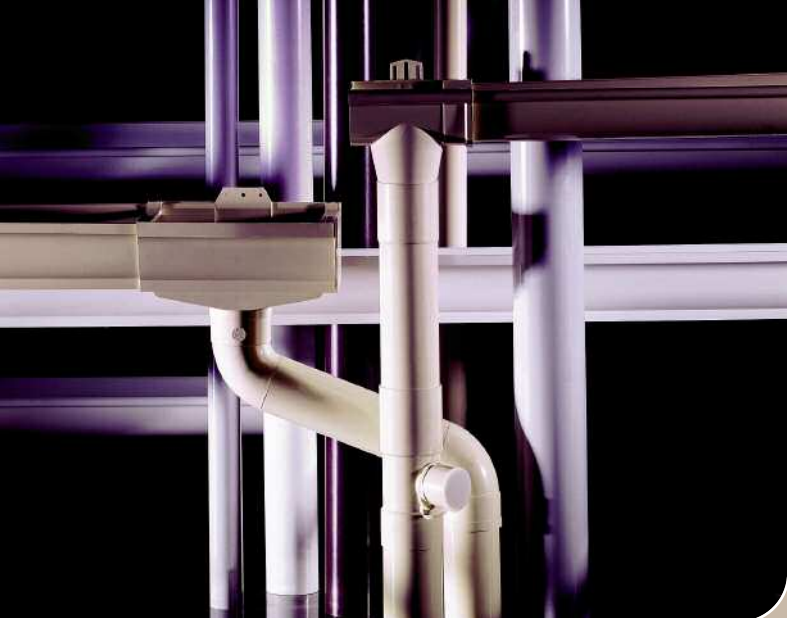

GIRPI

safety for your pipeworks

an *Aliaxis* company

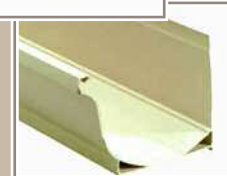

PVC RAINWATER SYSTEM

3 profiles shapes, 4 colours, 2 systems

3 profiles shapes

- **The square gutter** is suitable for roof surfaces below 30 m²: garden shelters, garages, balconies, greenhouses...

Jointing: cold welding.

- **The half round gutter** is suitable for all kind of buildings.

2 jointing methods:

- GIRPI patented rubber seals for the size 16, 25, and 33.
- Adhesive for size 25.

- **The “bandeau” gutter** adds a touch of elegance to your building.

Jointing: cold welding.

RELIABLE

- **Weather resistant:** excellent resistance to inclement weather and extreme temperature variations.
- **Corrosion resistant:** resist oxydation from outdoor aggressions: corrosive air, sea-air, pollution, fuel oil fumes, UV rays etc...
- **Shock-proof:** owing to its PVC and titanium oxide composition, the GIRPI rainwater system offers excellent mechanical and thermal damage resistance properties.

EFFICIENT

- **Leakproof:** sealing is ensured regardless of the system rubber seal or clamp type connection.
- **Rapid Installation:** simple and rapid installation with a limited number of tools: saving both time and money.
- **Complete system:** an extensive product range for all rainwater requirements and configurations: gutters, connectors and accessories.

AESTHETIC

- **Colours:** UV resistant, the GIRPI rainwater drainage system is available in several colours: natural white, beige, grey, brown.
- **Discrete:** regardless of the profile or colour, the GIRPI rainwater drainage system discretely harmonizes with all roof and facade styles.

How to select your rainwater system?

Roof surface areas covered by one outlet (in accordance with French regulation DTU 60.11)

Surface area covered (m ²)	30 m ²		71 m ²	113 m ²
Size	/	16	25	33
Diameter of pipe	53	50	80	100
Rainwater system	Square gutter cold welding	Half round gutter	Half round gutter cold welding or rubber seals or "Bandeau" gutter	Half round gutter rubber seal

Universal stopend for half round gutter size 16 and 25

GIRPI's universal stopend fits: profiles, running outlets (cold welding / rubber seal) indifferently right or left.

Therefore one single accessory replaces left stopends, right stopends, left stopend outlets and right stopend outlets.

You can obtain left or right stopend outlets by assembling universal stopends with running outlets references NCC or NCD.

Girpi's universal outlet is available in size 16 and 25 in 3 colours.

INNOVATION GIRPI

- *Simplicity.*
- *No risk of error.*
- *Rationality.*
- *Linear and stock optimized.*

ACCESSORIES TO COLLECT RAINWATER

**SAVE
WATER**

GIRPI designed accessories to collect rainwater from roof house Ø 80 to your garden shelter Ø 50.

- Rainwater collector junction.
- Rainwater tank connector kit.

- *Quick and easy installation without welding polymer.*

- *Installation directly on existing down pipe.*

- *Easy to dismantle for cleaning and maintenance.*

- *Designed to prevent tank overflow.*

- *More than half of the rainwater can be collected (up to 70% for the Ø 80).*

GIRPI has developed a leaf filtration grid and filter to save quality water collected and:

- to ensure the cleanliness of your gutters without having to clean it,
- to avoid block it up.
